- **Someone** of final authority **must** be at the job site at time of field measure to review the templates.
- **Final Seam location will be determined by Vinci Stone at the time of Field Measure**
- **All** cabinets are to be installed in their final resting-place. **We will not template if cabinets are missing or unsecured.**
- **All** items relating to the countertops are to be on site at the time of field measure. This includes sinks, faucets, cooktops, soap dispensers, instant hots, etc... Failure to provide all necessary items at time of field measure **will** result in a delay in fabrication and/or additional trip charges at a mimimum of \$200.00 per trip.
- **Old** countertops are to be removed prior to field measure so that we can verify the structural integrity of the cabinets and insure accurate measurements. **We will not template over old countertops.**
- **Fabrication delays and additional trip charges** can be avoided if the above items are addressed **prior** to the time of field measure.
- **We** recommend that you contact your dishwasher manufacturer or dealer for side-mount or floor-mount brackets. **Attaching a dishwasher directly to a stone countertop may result in fracture or discoloration of the stone.**
- **For** large or heavy undermount sinks, it is necessary to support the sink in the cabinet. Please follow any directions given by the sink manufacturer. If these directions cannot be followed, the diagram below illustrates how we recommend mounting these sinks. **This should be done prior to the time of field measure.**
